

From plywood to pine, Protopak has all your heat-treated lumber needs covered. We are a prime supplier of every variety of wood a supply chain requires. Our production facilities are ISPM-15 compliant and have served our customers' needs for over five decades. We have a solution for any application. For a complete list of our products and pricing, please get in touch with our knowledgeable, friendly team in Elgin, IL.

Products

Treated Plywood

We offer kiln-treated plywood in every variety to meet all your needs. Our plywood is ideal for interior framing, roof sheathing, packaging, or blocking. We have assortments available for indoor and outdoor uses.

Outdoor Use Lumber

We offer a wide variety of outdoor lumber for all construction usage. Our knowledgeable team can recommend the best products for any application. From decking boards to load-bearing studs, we have you covered.

Heat-Treated Lumber

We carry a full line of lumber suitable for any application. We are ISPM-15 certified, and all our offerings pass regular inspections. Ask about our volume-based discounting.

Dunnage Stamped Lumber

We offer debarked, stamped lumber ideal for blocking, chocking, and bracing your commodities in any transportation process. A dunnage mark must be applied every 24" at minimum, but we can tailor the stamping to your requirements.

Paneling Products

We offer a variety of industrial-grade materials, including hardboard, particle board, OSB, and plywood. Our inventory is customizable to meet your specific requirements. We ensure quality and precision to meet your needs precisely.

Pallet Boards & Runners

We specialize in providing runner pallets crafted with precision from three or more parallel pieces of timber, ensuring durability and reliability. Our pallets feature notched runners for 'four-way' entry, allowing forklifts to lift them securely from all directions.

Pre-Cut Lumber

We provide pre-cut lumber tailored for Just-In-Time (JIT) procurement, ensuring that you receive precisely measured materials exactly when you need them. This service streamlines your project timelines and reduces on-site waste, optimizing efficiency and cost.
